<b>Tunable AM Radio Loop Antenna ( TAM )</b>  A truly fantastic antenna, ideal for Portable Radios and those with an inbuilt Ferrite Rod or internal AM antenna, complete with easy to follow user guide and Australian Stations List. Tunes 520 to 1725KHz Our most popular product and the one that suits 99 percent of portable radios. This 36cm (14") Diameter Loop will significantly; lift the signal level of weak stations, extend reception range and improve sound clarity where only poor reception existed before !	A-LOOP-TAM	\$ 64
<b>Mini Tunable AM Radio Loop Antenna ( MTAM )</b> Same deal as above but compact. This antenna is only 23cm (9") but has the same electronics as the TAM Loop, however it has 25% less signal gain. Ideal for cramped locations, so if you need a Loop for your bedside clock radio but don't have a huge amount of space, or you like to travel and take a small radio with you then this is the model for you ! <b>Ideal for use with a Sangean PR-D7 AM Radio, see below</b>	A-LOOP-MTAM	\$ 64

### Hi-Fi Loop Antennas

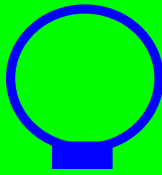

<b>Hi-Fi Loop - Matched Loop Antenna for Hi-Fi Receivers - Indoor Version</b>  A high performance Matched Loop Antenna designed to replace the poor performing Hi-Fi AM Mini loops supplied with Hi-Fi receivers and Bookshelf Systems. The optimised broadband design requires no tuning. Supplied with and configured for your choice of 5 or 10 metres of pre-made cable allowing you to mount the antenna well away from the receiver and any sources of interference, such as that found in Home Cinema racks etc... Internal Dip Switch Settings allow user selection of cable length used and optimum matching to your radio.  Suits, SONY, BOSE, TIVOLI (HENRY KLOSS), DENON, PIONEER, YAMAHA and most others with Loop Antenna terminals. This is a great new product with a design not seen elsewhere, it will really improve your Tuners AM performance! PK's Loop Antennas solve the age old problem of poor AM reception on Hi-Fi Receivers!
