Portable / Table Radio Loop Antennas

Tunable AM Radio Loop Antenna (TAM)

A truly fantastic antenna, ideal for Portable Radios and those with an inbuilt Ferrite Rod or internal AM antenna, complete with easy to follow instructions and Australian Stations List. Tunes 520 to 1725KHz Our most popular product and the one that suits 99 percent of portable radios. This 36cm (14") Diameter Loop will significantly; lift up weak stations, extend reception range and improve sound clarity where only poor reception existed before !

All of the 5 models are ideal for use with a Sangean PR-D7 AM Radio !

Mini Tunable AM Radio Loop Antenna (MTAM)

Same as above, but physically smaller at 23cm (9"), with 25% less signal gain. Ideal for cramped locations like; for your bedside clock radio, or if you like to travel with a small radio

Heavy Duty Tunable AM Radio Loop Antenna (HDTAM)

Heavy Duty (HD) 36cm/14" Loop for use in the Outback or in Harsh conditions, really robust !

Large Tunable AM Radio Loop Antenna (HDLTAM)

Large 40cm / 16" diameter high performance loop using our HD Series construction, it provides the extra signal gain and tuning sharpness required for DX work.

Extra Large Tunable AM Radio Loop Antenna (HDXLTAM)

Extra Large 50cm / 20" diameter high performance loop using our HD Series construction, it easily provides the extra signal gain and tuning sharpness required for serious DX work.

Hi-Fi Loop Antennas

Hi-Fi Loop - Matched Loop Antenna for Hi-Fi Receivers - Indoor Version

A high performance Matched Loop Antenna designed to replace poor performing Hi-Fi AM Mini loops supplied with Hi-Fi Tuner and Bookshelf Systems. The optimised broadband design requires no tuning. Supplied and configured with your choice of 5 or 10 metres of pre-made cable allowing you to mount the antenna well away from the receiver and any sources of interference, such as that found in Home Cinema racks etc... Internal Dip Switch Settings allow user selection of cable length used and optimum match to your Tuner.

Suits, SONY, BOSE, TIVOLI, DENON, PIONEER, YAMAHA and most others with AM Loop terminals. A great product not seen elsewhere, it really improves AM Tuner performance! PK's Loop Antennas solved the age old problem of poor AM reception on Hi-Fi Receivers!

A-LOOP-MATCH-5 5metres	\$ 90
A-LOOP-MATCH-10 10metres	\$ 95

HD Series Matched Loop Antenna for Hi-Fi Receivers - Outdoor Version

Commercial grade Outdoor Matched Loop Antenna, supplied with Heavy Duty Mount and can be used with RG-59 or RG-6Quad Cable up to 30m long. Ideal for building applications and easy to use DIP Switch configuration for Installers. (Freq. range 520 to 1725KHz)

(See below for optional Baluns/Amplifiers/Splitters etc)

C-LOOP-HDMATCH	\$ 150
----------------	--------

Amplified Long Range AM Antenna - Hi-Fi KIT - MKII

This 25cm (10") mini indoor amplified antenna is used for low AM signal levels on Hi-Fi Systems and Radios with Loop Terminals or Ant & Gnd terminals. Supplied with user guide, 2m BNC to open Ends Cable for connection to your radio and an Australian 240v Plug Pack for Mains operation. Optional DC Battery Lead also available.

Please also specify the type of radio that it will be used with =>

Remote Tuned Loop Antennas

Remote Tuned Shortwave & Longwave Loops

This Outdoor Antenna is remotely tunable across the main Shortwave Bands from 6-20MHz.

HD Series Loop Remote Tuned Loop designed specially for Shortwave Radio reception. The Loop decreases local noise and interference from adjacent stations and static leaving strong and clear reception. The Loop Control Box has an easy to use tuning control. The connection from the Loop to the Control Box uses two coaxial cables. There are many options available for this antenna, including antenna rotators etc, see below.

Remote Tuned Tropics Band 1.7 - 9 MHz version

Remote Tuned Longwave 180 - 500KHz version

Remote Tuned LW 150 - 450KHz version

Remote Tuned LW 130 - 400KHz version - Ideal for the new 2200m Band (137KHz)

Remote Tuned LW 80 - 200KHz version
